

Valora

For Hotel Asset Managers

The Problem

- Comparing actual hotel performance against underwritten assumptions requires rebuilding the model every time
- Presenting performance variance to investors or lenders in a clear institutional format is time-consuming
- Stress-testing the exit at different cap rates and NOI scenarios is manual and slow
- Portfolio-level views across multiple hotels in different currencies don't exist in one place

What Valora Does

Valora lets hotel asset managers input actual operating NOI alongside the original underwritten model — showing the gap instantly. Stress-test the exit, update assumptions in real time and produce a lender or investor-ready report in minutes.

Key Features for You

Actual vs Normalised NOI — Input real TTM NOI alongside model — gap shown immediately with % variance

Exit Sensitivity — Stress-test exit cap rate at any NOI scenario — know the exit range before you need it

DSCR Monitoring — Track debt service coverage against covenant thresholds in real time

Debt Yield + LTV at Exit — Lender metrics always visible — no separate spreadsheet required

Year-by-Year Performance — Hotel Advanced shows every year of the hold — compare actual vs budget

Multi-Currency Portfolio — 25 currencies — model every asset in its local currency, same platform

Shareable Investor Report — One-click investment memorandum — ready for LP or lender quarterly update

What You Can Model

Asset Manager Use Case	What Valora Delivers
Quarterly investor update	Actual NOI vs underwritten · exit sensitivity · DSCR · one-click report
Lender covenant monitoring	DSCR · Debt Yield · LTV at exit · always current
Repositioning underwrite	CapEx plan · stabilisation ramp · NOI recovery timeline
Exit timing analysis	Sensitivity matrix · cap rate stress · optimal exit window
Operator change scenario	Year 1 disruption modelled · ramp-up period · NOI recovery
LP reporting package	Institutional PDF memorandum · shareable link · Excel cashflow

Platform Coverage

Asset Classes	Currencies	Benchmarks	Markets
---------------	------------	------------	---------

BTR · BTS · Hotel Flip · Commercial Industrial · Mixed Use	25 currencies GBP · EUR · USD AED · MXN · BRL +19	SONIA · SOFR EURIBOR · EIBOR +11 others	UK · Europe · LATAM Middle East · USA Asia-Pacific
--	---	---	--

Next Step

Connect a live asset from your portfolio. Input the actual NOI, run the exit sensitivity and produce the investor report — all in the same session.
