

Valora

For Surveyors & Valuers

The Problem

- Residual valuations in Excel are time-consuming and hard to audit
- Clients increasingly expect sensitivity analysis alongside the headline number
- Cross-border instructions require different tax, finance and yield treatment
- Defending assumptions against a challenging client or lender takes preparation

What Valora Does

Valora runs a full residual land valuation with sensitivity analysis, AI market benchmarking and an auditable assumption set — in minutes. The AI sense check defends every assumption against market data.

Key Features for You

Residual Land Value — Automatic RLV calculation — maximum land value to hit target margin

Break-even Analysis — Break-even exit yield, rent psf and sale price — automatic

AI Market Comps — Live comparable data for build cost, rent, yield — any location

Sensitivity Matrix — Exit yield × rent stress — shows the range around your headline number

AI Sense Check — Market-aware challenge on every assumption — defensible against client queries

Shareable Report — Clean PDF with full assumption set — ready for client delivery

Tax Treatment — SDLT, VAT, CIL, Section 106 — correct for every UK and international instruction

What You Can Model

Valuation Method	Valora Output	Sensitivity Included
Residual (BTR)	RLV · GDV · Yield on Cost · IRR	Exit yield × rent — full matrix
Residual (BTS)	RLV · GDV · Margin · Break-even psf	Sale psf × absorption — matrix
Income (Commercial)	GDV · NIY / EY / VP exit	Yield × rent stress
Income (Industrial)	GDV · Yield on Cost · RLV	Yield × rent review stress
Hotel (Acquisition)	Exit value · DSCR · IRR	Exit cap × ADR — full matrix
Flip / Refurb	ROI · IRR · Equity Multiple	Sale price × refurb cost

Platform Coverage

Asset Classes	Currencies	Benchmarks	Markets
---------------	------------	------------	---------
